SDG 6 Synthesis Report 2018 on Water and Sanitation

In 2015, UN Member States adopted the historic [2030 Agenda](#), setting universal and transformative goals and targets, and committing to working tirelessly for their full implementation. To ensure that no one is left behind, it will be vital to track progress towards the goals.

This is why Member States follow-up and review the 2030 Agenda and its 17 goals every year at the [High-level Political Forum \(HLPF\)](#). This event facilitates the sharing of experiences, including successes, challenges and lessons learned. It also provides political leadership, guidance and recommendations for follow-up.

2018: Review of SDG 6

Every year at the HLPF, an annual theme helps an increased focus along with an in-depth review on a selection of SDGs. In 2018, [SDG 6 on water and sanitation](#) is one of the goals to be reviewed.

To provide input to Member States on this goal, UN-Water will produce the *SDG 6 Synthesis Report 2018 on Water and Sanitation*. This is a joint position from the UN family on the global status on SDG 6 and other water-related targets. The report also explores the linkages within SDG 6 targets and the interlinkages between SDG 6 and the other targets and indicators. The report builds on the baseline data on [SDG 6 global indicators](#) coming from [JMP](#), [GEMI](#) and [GLAAS](#).

UN-WATER PUBLICATIONS

Publications are a major output of UN-Water. These products are developed in different ways, take various forms and are used by many different stakeholders. What they have in common is that they draw on the experience and expertise of UN-Water's Members and Partners.

READ AND WATCH

- [Advance briefing](#) on the SDG 6 Synthesis Report 2018 for the High-level Political Forum. ([Arabic](#), [Chinese](#), [English](#), [French](#), [Russian](#), [Spanish](#))
