

# ANNEX B

## Tables of health-related SDG statistics by country, WHO region and globally

### Explanatory notes

The statistics shown below represent official WHO statistics for selected health-related SDG indicators based on evidence available in early 2018. In addition, summary measures of health such as (healthy) life expectancy, and basic demographic and health-economic statistics, are included to provide a general indication of the situation.

These statistics have been compiled primarily from publications and databases produced and maintained by WHO or United Nations groups of which WHO is a member. A number of statistics have been derived from data produced and maintained by other international organizations. For each indicator, the source of the data series is provided. Member States may have more data than are available for global monitoring.

For the first time in the World Health Statistics series, the type of data used for each data series (**comparable estimates**, **primary data** or **other data**) is also provided. Please refer to Part 1 of this report for more information on these different data categories. It is important to note that comparable estimates are subject to considerable uncertainty, especially for countries where the availability and quality of the underlying primary data is limited. Uncertainty intervals and other details on the indicators and statistics presented here can be found online at the WHO Global Health Observatory.<sup>1</sup>

While every effort has been made to maximize the comparability of statistics across countries and over time, users are advised that data series based on primary data may differ in terms of the definitions, data-collection methods, population coverage and estimation methods used. For indicators with a reference period expressed as a range, country values refer to the latest available year in the range unless otherwise noted. Please refer to the accompanying footnotes for more details. In some cases, as SDG indicator definitions are being refined and baseline data are being collected, proxy indicators have been presented in this annex and have been clearly indicated as such through the use of accompanying footnotes.

Unless otherwise stated, the WHO regional and global aggregates for rates and ratios are weighted averages when relevant, while for absolute numbers they are the sums. For indicators with a reference period expressed as a range, aggregates are for a specific year or period as indicated in the accompanying footnotes. Some WHO regional and global aggregates may include country estimates that are not individually reported.

Changes in the values shown for indicators reported on in previous editions of the World Health Statistics series should not be assumed to accurately reflect underlying trends. This applies to all data types (comparable estimates, primary data and other data) and all reporting levels (country, regional and global). The data presented here may also differ from, and should not be regarded as, the official national statistics of individual WHO Member States.

Note: – indicates data not available or not applicable.

- <sup>x</sup> WHO Global Health Workforce Statistics [online database]. Global Health Observatory (GHO) data. Geneva: World Health Organization (<http://who.int/hrh/statistics/hwfstats/en/>, accessed 30 March 2018). Country comparisons are affected by differences in the occupations included in the cadre. Please refer to the source for country-specific definitions and other descriptive metadata.
- <sup>y</sup> International Health Regulations (2005) Monitoring Framework [online database]. Global Health Observatory (GHO) data. Geneva: WHO (<http://www.who.int/gho/ihr/en/>). Global and regional aggregates are for the year 2017.
- <sup>z</sup> This indicator is presented here as it could constitute the health-related portion of the SDG indicator 1.a.2.
- <sup>aa</sup> Levels and trends in child malnutrition. UNICEF/WHO/World Bank Group Joint Child Malnutrition Estimates. New York (NY), Geneva and Washington (DC): United Nations Children's Fund, World Health Organization and the World Bank Group; 2018. Global and regional aggregates are for the year 2017.
- <sup>ab</sup> Progress on drinking water, sanitation and hygiene – 2017 update and SDG baselines. Geneva and New York (NY): World Health Organization and United Nations Children's Fund; 2017 (<https://washdata.org/sites/default/files/documents/reports/2018-01/JMP-2017-report-final.pdf>, accessed 31 March 2018) and Water and sanitation [online database]. Global Health Observatory (GHO) data. Geneva: World Health Organization ([http://www.who.int/gho/mdg/environmental\\_sustainability/en/](http://www.who.int/gho/mdg/environmental_sustainability/en/)). Comparable estimates are only shown for countries with recent primary data.
- <sup>ac</sup> The death rate is an average over the five-year period.
- <sup>ad</sup> Conflict deaths include deaths due to collective violence and exclude deaths due to legal intervention.
- <sup>ae</sup> Completeness was assessed relative to the de facto resident populations and refer to the latest available value for the period 2007–2016. Global and regional aggregates are for 2016.
- <sup>af</sup> Non-standard definition. For more details see the Joint UNICEF/WHO database 2018 of skilled health personnel ([https://data.unicef.org/wp-content/uploads/2018/02/Interagency-SAB-Database\\_UNICEF\\_WHO\\_Apr-2018.xlsx](https://data.unicef.org/wp-content/uploads/2018/02/Interagency-SAB-Database_UNICEF_WHO_Apr-2018.xlsx)).
- <sup>ag</sup> Proportion of institutional births (%) used as a proxy for the SDG indicator.
- <sup>ah</sup> Updated estimate.
- <sup>ai</sup> Preliminary data.
- <sup>aj</sup> Deviation from standard question or measurement method. For more details see World Contraceptive Use 2018 (<http://www.un.org/en/development/desa/population/publications/dataset/contraception/wcu2018.shtml>).
- <sup>ak</sup> Under country consultation as of May 2018.
- <sup>al</sup> Data refer to year 2016. Data for 2017 were submitted in a format that could not be included in the analysis.
- <sup>am</sup> Survey data did not cover the 0–59 months age range. Data were adjusted for comparability.
- <sup>an</sup> Conversion of estimates based on the old NCHS/WHO references to WHO Child Growth Standards when raw data were not available to allow comparability.
- <sup>ao</sup> Data are from a facility-based surveillance system, which include 80% of health centres in the country.
- <sup>ap</sup> Prevalence of overweight was calculated using BMI-for-age z-scores.
- <sup>aq</sup> For high-income countries with no information on clean fuel use, usage is assumed to be >95%.
- <sup>ar</sup> Completeness refers to year prior to 2012.
- <sup>as</sup> Data are from the Nutrition Survey System, which covers 25 provinces.
